

ENVIRONMENTAL PAPER PROFILE

1 of 2

Product: Envirocare 100% Recycled

Mill: Lenzing Papier

Website: www.lenzing.com

Country of Manufacture: Austria

Fibre

- Virgin:
- Recycled: Manufactured with 100% recycled fibre (sourced from mills local area).

Forestry Certification

- FSC Mixed Sources
- FSC 100% Recycled
- SFI Certified
- FSC Mixed Sources/Recycled
- PEFC Certified
- Mill's own procurement policy
(Available on request)

Recycled

- Post Consumer Waste: 75%
- Pre Consumer Waste: 25%
- Fibre Source: 75% printed reject composed of mid grades, 20% higher grades (partly printed), 5% own waste from recycled paper production.

Whitening Process

- Elemental Chlorine Free
- Process Chlorine Free
(Applicable to recycled fibre)
- Totally Chlorine Free
- Other: Manufactured without the use of optical brightening agents.

Environmental Awards or Accreditations:

- ISO 14001 EMS
- EMAS
- Blue Angel
- Nordic Swan
- Eu Eco-label
- NAPM
- Green Seal
- Eugropa
- Other: European Flower Award

ENVIRONMENTAL PAPER PROFILE

2 of 2

Energy

- Carbon Neutral Manufacture:** Envirocare 100% Recycled is NOT an offset carbon neutral product, however high use of renewable energy, recycled fibres and Lenzings' highly efficient production process mean Envirocare 100% Recycled is made with a very low carbon footprint. Further details in Additional Information.
- Renewable Energy:** Mill source 86% of their total energy requirements from renewable energy.
- Verifiable Emission Reduction Credits (VERs):**

Water, Air & Waste

Water: Lenzing operate a water waste management system. Full details are available on request.

Air: Mill operate a collect & recovery process. Full details of this air purification program are available on request.

Waste: No landfill leaves Lenzing Papier, all by-products are used for fuel or re-sold for other uses.

Additional Information

Lenzing Papier is a fully integrated recycled paper mill. Set in the small town of Lenzing (Austria) the mill has a very high focus on protecting the surrounding pristine natural environment. A key focus of the Lenzing team is to continuously reduce their own carbon footprint, rather than purchase carbon credits. As of August 2009 the production of one ton of Lenzing recycled paper produces 189 Kgs of CO2. This very low footprint is achieved through the use of recycled fibre, operational efficiency and renewable energy.
